

CLH130

Wireless HDMI Mini Transmitter
Receiver kit

Wireless Video Mirroring

Maintain or create wireless or networked security

Connect to most of TV, LCD Monitor, LED Display or projector without any cable, table boxes, wall plates, switchers or any proprietary and expensive equipment. Just connect to big screen wirelessly and enjoy flexibility and freedom.

All in One Solution

Complete solution for wireless connection and presentation

For a small to medium room or facility CLH130 could be a single device for wireless connection of any computer with VGA HD-15 connector. If devices have only video outputs like Composite video, Component then a Video converted could be added. For wireless HDMI or DVI connection see WH130.

Fast and smooth video playback

Smooth video playback for full motion video

With its proprietary compression algorithm and video processing watch favorite movie, training video or streaming videos from internet as full motion video by just launching your favorite applications Windows Media Player, VLC Player, Real Player or even launching browser to watch Youtube or Netflix videos.

HD and High-resolution

Enjoy presentation or video in high-definition

With HDMI output at 720p or 1080p, easily connect to HD display at 16:9 widescreen aspect ratios or connect to a standard 4:3 letterbox or widescreen 5:4 aspect ratio too

Multiple devices in for several screens

Put multiple screens in same room or individual screens in multiple rooms

With its unique, isolated and vacant 5.7 GHz spectrum multiple (up to 10) devices can be present and operational within 100-ft radius. Thanks to DFS algorithm built inside each transmitter and receiver pair.

Connect N Show

Walk into room and click to show laptop or Macbook screen

Make life easy for any laptop or Macbook users to show their screen by having them attach CLH130 to its VGA output to show entire screen on connected display to share screen. Less time wasted and more productivity.

HD and High-resolution

Match the resolution of connected display for sweet picture

With HDMI output at 720p easily connect to HD display at 16:9 widescreen aspect ratio or connect to a standard 4:3 letterbox or widescreen via VGA connector with most popular resolutions of XGA, WXGA and WXGA+
